Libra TMR

Next Generation Ration
and Data Management

400-15 Innovation Blvd.
Saskatoon, SK, Canada
S7N 2X8

A PRODUCT OF

Libra TMR

Libra TMR is a revolutionary ration weighing and data management solution. Its tablet-based design delivers a smart and simple way to build and manage your rations, pens, and feed groups. Know the exact weight of ingredients going into the mixer, track what has been fed to each pen, and easily export the data for vital information available at your fingertips!

Designed for the rugged agricultural environment, the Libra TMR device mounts directly on the mixer and connects to any industry-standard load cells for quick and easy installation.

Requires iOS 10 or newer.

FEATURES

App-Based

Use a tablet as your full-featured scale indicator

Get new app features and firmware updates right from the mobile device

Simplified Ration Management

Track each ingredient loaded and what has been fed to each pen in a feed group

Unlimited Remote Displays

View and tare live weights from multiple mobile devices within 400 feet of the mixer

Weighback

Precisely track and load refusal

Feedings

Divide any ration into multiple feedings per day

Mixer Timer

Set a custom timer after each ingredient and after the entire ration has been loaded

Dry Matter/As Fed

Load and feed rations on a dry-matter or wet-weight basis

Resize

Automatically adjust the batch size based on any loaded ingredient
